

DELU MADUEKWE

Calgary, AB | 587-433-4201 | delumadu@gmail.com | linkedin.com/in/delu-maduekwe

PROFESSIONAL SUMMARY

GIS student completing SAIT's Bachelor of Applied Technology in Geographic Information Systems, with a Bachelor of Science in Geological Sciences and a Commerce minor. Hands-on experience building mobile field-data workflows, automating GIS processes, integrating CAD and spatial data, and creating clear maps and dashboards. Interested in supporting energy and infrastructure projects through accurate data, practical field-to-office workflows, strong QA/QC, and collaborative project delivery.

TECHNICAL SKILLS

Field and web GIS: Survey123, Field Maps, QuickCapture, ArcGIS Online, ArcGIS Dashboards, Experience Builder, and web map publishing

Automation and integration: FME Desktop, ModelBuilder, Python, ArcPy, spatial ETL, batch processing, and repeatable geoprocessing workflows

CAD and spatial data: AutoCAD, CAD-to-GIS conversion, coordinate systems, georeferencing, digitizing, editing, and multi-format data integration

GIS analysis and mapping: ArcGIS Pro, QGIS, raster and vector geoprocessing, terrain and network analysis, suitability modelling, cartography, 3D scenes, and data visualization

Data management and QA/QC: Geodatabases, domains, subtypes, topology, attribute validation, metadata, SQL, PostgreSQL, and Microsoft Access

EDUCATION AND TRAINING

Bachelor of Applied Technology - Geographic Information Systems | **Southern Alberta Institute of Technology** | Jan 2026 - Present

Relevant coursework: GIS data capture, data conversion, spatial analysis, GIS programming, database management, Web GIS, enterprise GIS, remote sensing, and project management.

Esri Academy: 27 completed courses and labs, including Building Geoprocessing Models, Maintaining Attribute Data Integrity, network analysis, and deep learning in ArcGIS Pro and Online.

Bachelor of Science in Geological Sciences - Minor in Commerce | **University of British Columbia** | May 2020

Certificate of Advanced Digital and Professional Skills Training (ADAPT) | **Toronto Metropolitan University** | Oct 2020 - Dec 2020

GIS PROJECT EXPERIENCE

Project Manager / GIS Analyst - Avalanche Trigger-Zone Digital Twin | **SAIT Capstone Project with CIRUS** | May 2026 - Aug 2026

Responsibilities

- Combined LiDAR, land-cover, and terrain data in ArcGIS Pro to build a suitability modelling workflow for identifying possible avalanche trigger zones near Fernie.
- Processed point-cloud and raster data, managed project geodatabases, created a 3D scene, summarized candidate polygons, and extracted coordinates for field review and drone planning.
- Designed and published connected field-data workflows using Survey123, Field Maps, and QuickCapture, then displayed incoming observations in ArcGIS Dashboards for monitoring and validation.
- Managed a three-person team by organizing scope, tasks, client meetings, Gantt chart scheduling, technical risks, QA/QC, and final deliverables.

Achievements

- Built custom ArcPy and ModelBuilder tools to automate terrain processing, suitability modelling, trigger-zone summarization, coordinate extraction, and repeatable output creation, packaged in an Experience Builder application.
- Narrowed a 72.5 km² study area to 268 candidate zones covering 4.07 km² and delivered a documented ArcGIS Pro project, geodatabases, mobile applications, and coordinate outputs.

Project Manager / GIS Analyst - Calgary Livability Index | **SAIT GIS Final Project** | Jan 2026 - Apr 2026

Responsibilities

- Integrated and standardized transit, crime, green-space, and housing data from different sources to create a neighbourhood-level livability index.
- Used spatial joins, network analysis, field calculations, Hot Spot Analysis, and multi-criteria evaluation to compare Calgary communities.

Achievements

- Developed a repeatable index that used statistical methods and data analysis to calculate an overall livability score for each Calgary community.

- Created clear maps and visualizations that turned complex analysis into practical information for neighborhood comparison and planning decisions.

PROFESSIONAL EXPERIENCE

Games Coordinator | **Calgary Sport and Social Club** | *Jan 2026 - Present*

- Coordinate and officiate adult sports league games while following league procedures, schedules, and safety requirements.
- Communicate clearly, make decisions under pressure, and resolve conflicts while maintaining a safe and positive environment.

Programs Officer | **Ontario Chamber of Commerce** | *Jan 2021 - Dec 2025*

- Reviewed more than 500 grant applications and helped administer and distribute over \$20 million in wage subsidies while following program and documentation requirements.
- Managed high-volume applicant, employer, and financial data in Excel and Google Sheets while keeping records accurate, consistent, and confidential.
- Prepared contracts and official communications, explained requirements to applicants, worked across teams, and balanced competing deadlines in a fully remote role.

Freelance Photographer | **DLM Media, Calgary** | *Current*

- Plan and deliver photography projects for Calgary hospitality, restaurant, nightlife, and sports brands, turning client ideas into polished visual content.
- Handle client communication, scheduling, budgets, payments, editing, file delivery, and multiple deadlines from the first conversation through final delivery.
- Use strong visual composition and organized file-management practices to maintain image libraries and deliver consistent, client-ready work.

ADDITIONAL GEOSCIENCE AND GIS EXPERIENCE

- Built an ArcGIS-based Mount Rainier hazard model using elevation and other geospatial data to identify areas that could be exposed to volcanic hazards (2018).
- Completed field-based geological mapping and structural analysis in rugged terrain at Oliver White Lake Grasslands, Mount Keogan, and Salt Spring Island (2018-2019).
- Completed lithological logging and data processing for the Nisku, McMurray, and Cardium formations, along with petrographic and geochemical analysis (2019).

LEADERSHIP AND VOLUNTEER EXPERIENCE

Finance / Treasurer Executive | **SAIT BGIS Student Club** | *2026*

- Kept payment records, prepared a preliminary budget and funding application, and connected with industry contacts for student lunch-and-learn events.
- Helped organize a successful industry night and poster competition for BGIS students, instructors, and GIS professionals.

Soccer / Futsal Assistant Director | **UBC Recreation Intramurals** | *Sep 2018 - Apr 2019*

- Helped run leagues with 100-150 participants per term, coordinated officials and volunteers, confirmed player eligibility, and supported safe day-to-day operations.
- Used Excel macros to track scores, player statistics, and all-star selections, and provided photography and media content for the program.
